Portfolio

Professional Experience

Field Engineer

May 2025 – Present

ENTACT LLC

Chicago, IL

- Directly supervise four field engineers by assigning and approving work, setting weekly priorities, and developing independent capability in surveying, QA/QC, safety, reporting, and project controls.
- Direct field execution by independently managing work sequencing, crew and equipment allocation, survey/grade corrections, material placement, and QA/QC corrective actions while escalating design or safety changes.
- Developed an automation suite for field reporting, quantity and equipment tracking, and time entry to reduce manual work, with selected applications documented in the portfolio.

Subsurface Utility Engineer

Jun 2024 – Apr 2025

Lockwood, Andrews & Newnam

Houston, TX

- Coordinated subsurface utility investigations across 20+ TxDOT roadway corridors by reviewing plans, as-builts, and field-verification data to identify water, sewer, gas, electric, telecom, and drainage conflicts and support relocation planning.
- Led coordination meetings with clients, utility owners, and designers while mentoring two newly hired subsurface utility engineers in utility research, conflict documentation, and coordination workflows.
- Developed Excel and MicroStation standards, client-communication templates, and standard operating procedures for utility research, conflict identification, plan production, field-data review, and relocation tracking.

Automation Engineer – Part-Time

2023 – Present

BioNatal LLC

Remote

- Audited and optimized business-wide workflows using Microsoft Power Apps, Power Automate, and custom-built programs to reduce manual work, with selected results documented in the portfolio.
- Developed applications for product and inventory tracking, automated marketing-asset production, and customer-feedback collection to support operations and product improvement.

Project Experience

AEP – OVEC/IKEC Clifty Creek Station

Dec 2025 – Present

Lead Field Engineer – Type I Landfill Construction & Coal Ash Pond Closure

Madison, IN

- Serve as Lead Field Engineer and Construction Quality Control Manager for a three-year, \$60 million project encompassing construction of a Type I landfill and closure of the 75-acre West Boiler Ash Pond and 51-acre Leachate Runoff Collection Pond.
- Implement plans and specifications, manage project forecasting and material/cost tracking, and design dewatering ditches that collectively handle more than 1 million gallons per month.

Venture Global CP2 LNG

Jun 2025 – Dec 2025

Field Engineer – Soil Solidification

Cameron Parish, LA

- Managed Portland cement usage and stabilized-soil production for a six-month, \$86 million scope treating approximately 2.8 million cubic yards, supporting material control, reporting, and schedule tracking.
- Verified Portland cement application rates, treatment depth, moisture conditioning, mixing, compaction, and density testing, directing corrective work when results did not meet project requirements.

TxDOT I-35 Roadway Expansion

Jun 2024 – Apr 2025

Subsurface Utility Engineer – Utility Conflict Identification and Relocation

Georgetown, TX

- Identified and documented 500+ conflicts between proposed roadway improvements and existing water, sewer, gas, electric, telecom, and drainage utilities for the Georgetown section of TxDOT I-35.
- Produced a utility-conflict matrix and project drawing illustrating all identified conflicts to support utility relocation proposals and roadway-design coordination.

Education

Rice University

May 2025

B.S. Mechanical Engineering – Mechanics/Dynamics Specialization

Houston, TX

Skills & Certifications

Software: AutoCAD Civil 3D, MicroStation, ArcGIS Pro, ProjectWise, Bluebeam Revu, Trimble Siteworks, Trimble Business Center, Microsoft Project, Oracle Primavera P6, Viewpoint Vista, Excel, Power Apps, Power Automate, OpenAI Codex, Linux
Equipment Operation: CAT 300 Series excavators, D Series dozers, skid-steer loaders, rollers, and articulated dump truck
Certifications / Languages: HAZWOPER 40-Hour, CPR; Spanish (Fluent)
