

Jorge Hinojosa

Field Engineer | Geotechnical Remediation & Construction

jhinojosa0@tutamail.com • (956) 929-7955 • Houston, TX • jhinojosa1.github.io/portfolio

Portfolio

Professional Experience

Field Engineer

May 2025 – Present

ENTACT LLC

Chicago, IL

- Lead four field engineers by assigning work and cross-training the team in surveying, material tracking, safety, reporting, and CAD to balance workloads and maintain role coverage.
- Direct field personnel and equipment operations to complete project scopes in accordance with project plans and specifications, coordinating 6–15 machines as needed and verifying production, material use, and completed work.
- Built an automation suite for field reporting, quantity and equipment tracking, time entry, survey, and CAD that replaced manual workflows and is used by about 10 people across project teams.

Subsurface Utility Engineer

Jun 2024 – Apr 2025

Lockwood, Andrews & Newnam

Houston, TX

- Delivered 17 TxDOT corridor packages to the client in one year by coordinating subsurface utility investigations across 20+ corridors, reviewing plans, as-builts, and field data to identify conflicts and support relocation planning.
- Led weekly coordination with clients, utility owners, and designers while training two new engineers to work independently within two months.
- Developed Excel and MicroStation standards, communication templates, and standard operating practices for utility research, conflict review, plan production, and relocation tracking, adopted by the four-person department.

Selected Project Experience

AEP – OVEC/IKEC Clifty Creek Station

Dec 2025 – Present

ENTACT LLC — Project Assignment: Lead Field Engineer

Madison, IN

- Serve as Construction Quality Control Manager for a three-year, \$60 million Type I landfill and pond-closure project covering a 75-acre boiler ash pond and a 51-acre Leachate Runoff Collection Pond; lead inspections, corrective work, and technical submittals to meet material and grading specifications.
- Supported a successful bid for an additional \$2 million contract scope by identifying and negotiating with vendors for erosion-control materials, seeding, and equipment.
- Designed quicklime soil-solidification plans covering 20 acres of a boiler ash pond, Portland-cement soil-solidification plans covering 15 acres of the Leachate Runoff Collection Pond, and dewatering ditches handling more than 1 million gallons per month.

Venture Global CP2 LNG

Jun 2025 – Dec 2025

ENTACT LLC — Project Assignment: Field Engineer

Cameron Parish, LA

- Maintained Portland cement usage and production records for an \$86 million, six-month soil-solidification scope treating approximately 2.8 million cubic yards, supporting progress reporting and project planning.
- Built automated field-data, production-tracking, and reporting workflows that aided the engineering department in securing 700,000 cubic yards of soil-solidification work from another subcontractor.

TxDOT I-35 Roadway Expansion

Jun 2024 – Apr 2025

Lockwood, Andrews & Newnam — Project Assignment: Subsurface Utility Engineer

Georgetown, TX

- Identified and documented 500+ conflicts between proposed roadway improvements and existing water, sewer, gas, electric, telecom, and drainage utilities for the Georgetown section of TxDOT I-35.
- Produced a utility-conflict matrix and project drawing of all identified conflicts for the client and designers to support utility relocation proposals and roadway-design coordination.

BioNatal LLC

2023 – Present

Automation Engineer - Part-Time

Remote

- Automated business workflows with Microsoft Power Apps, Power Automate, and custom programs, saving about 20 hours per week for a three-person team.
- Built a product/inventory app that replaced Katana MRP (\$300/month), an AI campaign-image generator that replaced a full-time photography/editing subcontractor, and an email-feedback pipeline that grouped responses into actionable themes.

Education

Rice University

May 2025

B.S. in Mechanical Engineering – Mechanics/Dynamics Specialization

Houston, TX

Skills & Certifications

Software:

AutoCAD Civil 3D, MicroStation, ArcGIS Pro, ProjectWise, Bluebeam Revu, Trimble Siteworks, Trimble Business Center, Microsoft Project, Viewpoint Vista, Excel, Power Apps, Power Automate

Equipment Operation: CAT 300 Series Excavators, D Series Dozers, Skid-Steer Loaders, Rollers, Articulated Dump Trucks

Certifications: 40-Hour HAZWOPER, CPR • **Language:** Spanish (Fluent)
